

Quality Policy

Xcalibur Smart Mapping is an industry leading geoscience company providing geophysical data acquisition and interpretation services using cutting edge technology and expertise to its clients and associates across the globe.

Xcalibur Smart Mapping is fully committed to working with its clients and suppliers to create value by optimizing the discovery of natural resources and achieve its vision of being the geoscience partner of choice.

Xcalibur Smart Mapping commits to:

- Achieve high quality performance in Operational Management through demonstrated leadership, ethical behaviour, efficient resource utilization and adherence to Xcalibur and industry standards and practices.
- Listen and respond to its customers and exceed their expectations.
- Continually improve its products and services leveraging its competencies and technological developments.

To achieve these aims, Xcalibur Smart Mapping will:

- Follow a process approach to all aspects of operations ensuring risks to people, environment, service delivery and company are identified and mitigated.
- Implement systems and processes to ensure compliance to international standards, industry regulations and statutory regulations.
- Use customer feedback, audits, and management reviews to ensure that its systems remain effective and capable of meeting company, industry, and customer expectations.
- Strive to continually improve the effectiveness of these management systems by setting measurable objectives, analysing feedback, and acting on the results.

A handwritten signature in blue ink, appearing to read 'A. Blanco', is positioned above the name of the CEO.
